Central  
Europe*

Partnership with an atypical African courageous organization for the development of The Gambia is a challenging invitation !  
Indeed, the classic development since the last 50 years brought no solution to the problem of poverty.

The Gambia is, despite many positive changes in recent years, no exception. International solidarity continues to play an important role!

**Coming up**  
the annual meeting of Afrikaada Teeth-savers. Will 2012 be held in march in Stockholm. Exact time and place will be announced at a later date.

Since 2010, after the exemplary efforts of our Swedish friends, the contribution from Belgium began and this on two levels.  
There is the training of dental students by Belgian dentists and in addition to this training for general subjects such as socio-economics, sustainable agriculture, textiles and organizational development.

On the other hand, there are small projects for local investments through the Afrikaada Clubs.

In 2011 we have:

- connect and install three water tanks in schools,
- complete the infrastructure in the headquarters in Fajara,
- start the fluoridation of drinking water and
- support for organizational development.

There is a lot to do in terms of vision, planning, demarcation of the areas, financial management and harmonization of international assistance and cooperation of donors.

We will start in 2012 the family medicinal gardens in some villages, continue the further training in sustainable agriculture and support the organizational strengthening.

The recommendation I want to launch is to come together in 2012 as internationalists and this to learn from each other how we can join forces. This is to contribute to sustainable outcomes for this unique project.

***Thank you so very much for  
your help!***

We want to extend our thanks and gratitude for the help we have received during 2011.

Thank you for materials, instruments, equipment .

And thank you all volunteers who during both short visits and long term stays have helped a good deal of Gambian and Senegalese children and youth during the past year.
